OBSERVATIONS

- ❖ In Spite of their lack of knowledge, students are still trying to pursue their job with all

the resources available in their reach.

- ❖ In terms of communication, being presentable for their job, job readiness and other things regarding the job/interviews, they need to develop their skills more.
- ❖ Students need to be more realistic in regards to their expectation towards the salary and other benefits.
- ❖ As ITI students have a mindset and inclination towards government jobs and they only opt for private jobs after crossing the age of 30. We are trying to divert their mindset by bringing better and more job opportunities, giving them realistic knowledge of the World of Work, prep talk with employers and in regards to the World of Work.
